

## HSE Consulting Services

Working with companies to improve their HSE related processes.

For companies looking at setting up Health, Safety and Environment Management Systems, AiS provides services to design and implement Management Systems to international standards.

For companies that already have a system in place, AiS will streamline and update the system and for companies starting from new, AiS will setup and implement a suitable HSE Management System compatible with ISO 45001/14001/9001 as required.
